United of Omaha Life Insurance Company
A Mutual of Omaha Company

Life is filled with moments that matter – first steps, taking off the training wheels, graduations, weddings, funerals. Some are happy moments, some less so, but they all matter.

You can help protect all those meaningful moments no matter how far off they may seem, with Indexed Universal Life Express® (IUL Express).

Protect Your Future

The death benefit from an IUL Express life insurance policy is paid directly to your beneficiaries to help them replace your income and to maintain their standard of living – even though you’re no longer around to provide for them.

Affordable Premiums and Lasting Protection

When you purchase your policy, you can select how much you want to pay. This will be your **planned premium**. The premiums for an IUL Express policy are flexible, so your agent/producer will help you determine a planned premium that works for your budget and also provides you with the life insurance protection you need.

Your policy also has a **no-lapse protection premium**. As long as you continue to pay a planned premium that is equal to or above the no-lapse protection premium amount, you can be assured that your policy will provide guaranteed coverage for 20 years or until age 80, whichever comes first. Guaranteed protection helps provide the security you want for those you care about. If you live beyond the no-lapse protection period, your death benefit can extend beyond it, as long as the policy’s surrender value is sufficient to cover the policy’s monthly charges.

Your Policy Has Growth Potential

In addition to death benefit protection, your IUL Express policy also has the potential to accumulate a cash value.¹ That's important because it can help extend the policy's death benefit beyond the no-lapse protection period. It may even allow you to reduce or stop your future premium payments.

Here's How Your Policy Earns Interest

The accumulation value within an IUL Express policy may earn interest at a rate that is calculated based on the performance of a market index. It also offers a fixed interest crediting strategy.

Let's Begin With a Few Definitions

Participation Rate - The percentage of the overall index return that will be used in the calculation of the index interest credit.

Cap Rate - The maximum interest rate used in the calculation of the index interest credit for each segment.

Floor - The minimum interest rate used in the calculation of the index credit. IUL Express has a 0% floor, which means your index interest credit will not be less than 0% due to negative market index returns.

Segment - A portion of an index account that may be credited interest based upon the performance of the index. New segments are created on the 10th of each month. The policy may contain multiple segments at one time. Each segment will end or mature one year after it begins (on the segment maturity date).

The company declares the participation rate, cap rate and floor monthly. Once a segment is created, these are guaranteed until the segment matures.

Now Let's See How Your Index Rate is Calculated

IUL Express uses one of the most straightforward index crediting methods. It's known as annual point-to-point. What that means is that it calculates the index interest rate by comparing the index value on the date a segment is created to the value one year later to determine the percentage of change that took place during the year. The participation rate, cap rate and floor are then applied to determine the index interest rate to be credited to the funds currently in that segment.

Hypothetical Example:²

At the beginning of the segment, the index was 2,000. One year later, it had increased to 2,150. Indexed interest would be calculated as follows:

$$100\% \times \frac{2,150 - 2,000}{2,000} = 7.5\%$$

The final crediting rate is subject to a cap and floor rate.

Although the index interest rate is based on the performance of the chosen index, the accumulation value is not actually invested in the stock market. The index performance is only used in the calculation of the index interest credited to the policy.

¹The amount that may be available through loans or withdrawals, as defined in the contract.

²This example assumes you have selected the 100% participation rate crediting strategy. Other crediting strategies are available. If these strategies interest you, please ask your agent/producer or refer to the Indexed Interest Allocation Options sheet, 458454.

Life Insurance Protection – Plus

Your primary reason for purchasing a life insurance policy is to help protect those you care about with a death benefit. IUL Express also comes with living benefits you can take advantage of while you're alive. They add flexibility to your coverage and allow you to feel even more confident about the options your insurance policy provides.

Options to Access Your Death Benefit Early

IUL Express offers living benefits that may allow you to access a portion of your death benefit early. For each of the following Accelerated Death Benefit Riders, the requested benefit amount may not exceed 80% of the policy's face amount as of the policy issue date.³

- **Terminal Illness Rider** – Provides an accelerated death benefit if the insured provides evidence from a physician that their life expectancy is 12 months or less.
- **Chronic Illness Rider** – Provides an accelerated death benefit if the insured is unable to perform two of six Activities of Daily Living (ADLs) for 90 consecutive days as certified by a physician or requires substantial supervision due to severe cognitive impairment.
- **Critical Illness Rider** – Provides an accelerated death benefit if the insured has been certified by a physician as having one or more of the following conditions within the prior 12 months: ALS, kidney failure, life-threatening cancer, major organ failure, heart attack, stroke, dementia (including Alzheimer's), major burns, AIDS or aortic aneurysm surgery.

Access to Your Policy's Cash Value⁴

The primary focus of IUL Express is to provide long-term death benefit protection. But things come up and you may have an unexpected need to access your cash value – possibly to help with one of your children's college expenses, to help supplement your retirement income, or to pay for emergency expenses. Whatever the reason, you can access your policy's cash value through income tax-free loans and withdrawals.⁵

Additional Ways to Customize Your Policy

We also offer a variety of riders you can add to your policy to customize your protection. These riders may have an additional cost. Your agent/producer can guide you through a thorough discussion of the benefits of these riders.

The Next Steps

Once you determine if IUL Express may be right for you, your agent/producer will help you complete an application in which you will answer a few questions regarding your health history. No lengthy health inquiries or medical exams are needed.

Our underwriters will review your application and determine your eligibility. If your application is approved, you will receive your policy. We recommend that you meet with your agent/producer regularly to review your policy to ensure that it continues to provide adequate protection for those you care about most.

Consult with a professional tax and/or legal advisor before taking any action that may have tax or legal consequences.

³Final benefit amount is subject to the terms and conditions of the riders.

⁴The amount that may be available through loans and withdrawals, as defined in the contract.

⁵Any policy withdrawals, loans and loan interest will reduce policy values and benefits. For federal income tax purposes, tax-free income assumes (1) withdrawals do not exceed tax basis (generally, premiums paid less prior withdrawals); and (2) the policy does not become a modified endowment contract. See IRC §72, 7702(f)(7)(B), 7702A. This information should not be construed as tax or legal advice. Consult with your tax or legal professional for details and guidelines specific to your situation.

Why Mutual of Omaha

Over 50 years of Mutual of Omaha's Wild Kingdom taught us that the animal kingdom and the human kingdom have something in common ... an instinct to protect what matters most. Through insurance and financial products, we help people protect their lives, protect their families, protect their kingdoms.
