- An accumulation value that has the potential to increase based on the performance of a market index
- Flexibility for the future
- Simplified underwriting that doesn't require a lengthy health inquiry

Death Benefit Options

Level (Option 1) - Your death benefit will stay the same throughout your policy.

Increasing (Option 2) - Your death benefit may increase over time and will equal your specified amount of insurance plus the policy's accumulation value.

Premium Payments

Your policy premiums are flexible, meaning that you can increase or decrease the amount of your payment. As long as your surrender value is sufficient to cover your policy's monthly charges, your policy will remain in force.

No-Lapse Protection

By continuing to pay premiums equal to or above the no-lapse protection premium, you are guaranteed that your death benefit will last for 20 years or until age 80, whichever comes first.

After the no-lapse protection period, your policy can continue on a non-guaranteed basis.

Accumulation Value

Your policy's accumulation value may earn interest at a rate that is calculated based on the performance of the chosen index or at a current fixed rate of interest. The minimum guaranteed rate for all index interest crediting strategies is 0% and the minimum guaranteed rate for the fixed account is 2%.

Index Interest Crediting Strategies

You can allocate your values among the following four index interest crediting strategies:

- **S&P 500® 100% Participation**
- **S&P 500® One-Year High Participation**
- **S&P 500® One-Year Uncapped**
- **BofA U.S. Agility Index: One-Year Uncapped**

All strategies use an annual point-to-point crediting method.

For more information on how these strategies work, refer to the Indexed Interest Allocation Options sheet, 458454.
